SUMMARY

Computer Science undergraduate specializing in Cloud Computing, with internship experience developing full-stack applications using Java, Spring Boot and MySQL. Strong foundations in data structures, object-oriented programming and database management, with projects spanning web development, AI integration and algorithm visualization.

WORK EXPERIENCE

Software Development Intern | Rapidsoft Technologies Pvt. Ltd.

Gurugram, Haryana | June 2026 - July 2026

- Developed a Campus Lost & Found Portal using Java, Spring Boot, Spring Security, JWT, JPA/Hibernate and MySQL, integrating web interfaces with REST APIs.
- Built modules for item reporting, claim requests, notifications and admin approval workflows, with Student and Admin user flows and JWT-based login.
- Managed relational data with JPA/Hibernate and MySQL and tested API endpoints using Thunder Client.

EDUCATION

B.Tech, Computer Science Engineering (Cloud Computing)

SRM Institute of Science and Technology, Ghaziabad, Uttar Pradesh

CGPA: 9.10/10 | **Expected graduation:** August 2028

PROJECTS

Campus Lost & Found Portal | Full-Stack Web Application

Java, Spring Boot, MySQL, React | [GitHub: campus-lost-found-portal](#)

API source: github.com/sxnchita/lost-found-portal-backend

- Implemented weighted matching of lost and found items using category, color, model and text similarity, with approval workflows and claim tracking.
- Added handover scheduling, notifications and audit logs; organized REST services into controller, service and repository layers with DTOs and validation.

InterviewIQ | Interview Preparation Platform

Node.js, Express.js, MongoDB, Gemini API | [GitHub: interviewiq](#)

- Developed APIs for user registration/login, coding problems, mock interviews and resume analysis, using JWT authentication and bcrypt password hashing.
- Integrated Gemini for interview questions and feedback, with MongoDB storage for sessions, responses and evaluation reports.

DSA Algorithm Visualizer | Interactive Learning Tool

Python, Flask, JavaScript | [GitHub: dsa-visualizer](#)

- Built APIs returning execution steps for five sorting algorithms, BFS, DFS, Dijkstra, binary search, linked lists, stacks and queues.
- Added input checks and consistent JSON success/error responses for interactive visualizations.

TECHNICAL SKILLS

Languages: Java, C++, C, SQL, JavaScript, Python, HTML, CSS

Frameworks & APIs: Spring Boot, Spring Framework, Spring Security, JPA/Hibernate, REST APIs, JWT, Node.js, Express.js, Flask

Databases & tools: MySQL, MongoDB, Git, GitHub, VS Code, Spring Tool Suite, Thunder Client

Core concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS

POSITIONS & ACTIVITIES

Core Member, AXIONS Dance Club, SRM Institute of Science and Technology.
